EXPERIENCE PROFILE

Self-Learning: REST API'S, Markdown, YAML, JSON, POSTMAN, SWAGGER EDITOR, OPENAPI SPECIFICATION, cURL, GIT from <https://idratherbewriting.com/learnapidoc/> by TOM JOHNSON

I had participated in GITLAB Hackathon last year and worked on a few basic documentation issues and merged PRs.

Markdown, YAML, API user guide and Admin guide Samples are in <https://github.com/UmaRajamani/Technical-Documentation>

Organization: EwandzDigital

Responsibilities: *User guide and Quick start guide*

- Created user guide for an internal tool for the client Clearwateranalytics.com.
- Created a quick start guide for an internal tool using Palig

Organization: RSI Content Solutions (now Contiem)

Responsibilities: *Installation Guides and Developer Documentation*

- Created Installation Guides and Developer documentation for the Product RSuite Enterprise, an CCMS, using Oxygen XML editor.
- Updated the product website for the latest version of the product and created how to setup a development environment, installing necessary software in Linux and Windows, for newbie developers.
- Used Visual Studio Code editor for pull and push requests to AZURE DevOps documentation repository, to update documents created using Markdown. Used Pandoc to convert Word documents to Markdown. Updated the .yml file adding the images, Markdown files, and folders. Ran the pipeline and verified that the documents are available in the desired documentation repository.

Organization: Yorke Communications

Responsibilities:

API documentation

- Created API documentation for an US based Bank. For JSON-RPC based API's created a API user guide describing the services, service categories, access protocols, process flow, authentication, JSON-RPC 2.0 request and response structure, sample request and response parameters, detailed description of parameters, HTTP errors, status codes and error codes. Tested the API's using Postman to ensure accuracy and how to interpret the response.

User Guide and Admin Guide

- Created User Guide and Admin Guide for software products for an US based Bank.

Organization: Orion

Responsibilities:

Installation Guides

- Created Docker based appliance and Collaboration Software Installation Guides in Confluence.

User Guide

- Created Metadata Harvester User Guide for the data lineage software and Messaging Services User Guide using Confluence.

Organization: ISGN

Responsibilities:

Release Notes

- Documenting known issues and enhancements of the product release.

User Guide

- Updating User Guide for new enhancements and Compliance related enhancements using Adobe Framemaker.

Organization: Cognizant Technology Solutions

Responsibilities:

Release Notes

- Documenting release notes for major and patch releases.
- Documenting known issues and enhancements of the product release.

Online Help

- Updated Online help for new enhancements using Adobe RoboHelp.

Job Aids and Quick Reference Card (QRC)

- Created Job Aids and QRC documents for Service Now Cloud Solution.
- Developed Job Aids that described the important features and step-by-step instructions to help them adopt the tool quickly.

Standardizing Documents

- Reviewed the TCOE Process documents, System Testing and Computer System Validation (CSV) deliverables, Reverse KT documents, Test Plans, Test cases, and Test Protocols IQ, OP, PQ documents, for consistency in presentation, language, structure and visual presentation, and accuracy in content.
- Collaborated with the team to create template for project documents.

Reviewing Documents

- Refined UI messages, Error messages and Data Quality (DQ) rules.
- Reviewed around 5400 error messages for accuracy and consistency.

Creating and Reviewing Documents

- Created content for PACE internal Innovation Council Website and for Flash Video Presentation
- Created User Manuals for in house tool called Analyzer.
- Reviewed and Formatted Word Proposal documents and Power point Proposals.
- Revamped PACE Website static content and design in 2012 and then in 2015 making it Best in class website.
- Updated and maintained PACE repository of assets including Proposals, updated in repository from all locations and all verticals. Worked on Mobile Performance Engineering RFPs and estimations.
- Prepared Revenue Forecasting Report with Backlog and Pipeline data for each month .
Coordinated Audits based on Audit Framework Auditing Guidelines.

Organization: Bahwan Cybertek Pvt Ltd

Responsibilities: User Documentation

- Interacted with business analyst and client stake holders during all phases of the document development life cycle (DDLC).
- Prepared User Manuals, Brochure, Feature list, Trouble Shooting Guide, and Installation Guide for the following components of the Product Cuecent Business Process Management Suite version 5.1

Organization: Quscient Technologies

Responsibilities: User Documentation

- Created User Manual for the application “Energy Efficient Program Management” (EPPM).
- Designed the template and TOC
- Gathered Requirements from Functional specs, use cases, demo, and exploring the prototype / application and periodic interaction with the SMEs
- Structured the content flow and getting it reviewed (self review, peer review, technical review/SME review and client review)
- Performed extensive review and technical editing
- Tested and verified the content accuracy by testing the product features using the user manual

Organization: HCL Technologies**Responsibilities: *Prepared User Guide for HUM for CISCO***

- LAN Management Solution (LMS) Authoring User guide for Health and Utilization Monitor (HUM) version 1.2. Deliverables are User guide, Online Help, and Release Notes.
- Responsible for understanding networking products and solutions to deliver end-to-end documentation in line with the Cisco-specific Great Engineering Methodology (GEM) process and tools.
- Edited error messages, authored new features using Adobe Framemaker, developed online help files, and sent them for alpha, beta reviews through PRQR, and incorporated review comments.

Organization: Photon Infotech**Responsibilities: *User Documentation***

- Prepared User Guide and Admin Guide for Strategic Imaging Widgets.
- Prepared Compliance Document, Software Requirements Specification, Use Cases, and Food and Drug Administration (FDA) compliance document, Requirements Traceability Matrix Document for Koves (Fertility Cryobank application).

Organization: K9 Technologies**Responsibilities: *Maintained and updated User Guides***

- Review of User Guides of various modules of Wealth Management System namely Core Transaction Entry, Transaction Processing, Parameterization, Maturity Processing, Order Placement, Blotter, Brokerage, Special Products, Reports and MIS Reports.
